

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience in platform engineering, system architecture, cloud infrastructure, and scalable software development. Strong in Ruby, Ruby on Rails, Python, Kubernetes, AWS, Terraform, and CI/CD, with experience modernizing platforms, cross-platform delivery, and distributed systems. Proven ability to take complex initiatives from planning through execution, improving performance, reliability, and developer productivity. Focused on AI-assisted engineering with LLMs, Claude Code, and MCP.

TECHNICAL SKILLS

Architecture & Platform	System Design, Platform Engineering, Release Engineering, Cross-Platform Engineering, Distributed Systems, Production Engineering
Cloud & Infrastructure	AWS (EKS, EC2, S3, IAM, VPC), Azure (AKS), GCP, Linux
Containers & Orchestration	Kubernetes, Docker, Helm, ArgoCD, Terraform, Puppet, Packer, Ansible
CI/CD & Build Systems	Jenkins, GitHub Actions, Multi-OS Build & Test Matrices, Cross-Platform Packaging
Languages & Frameworks	Ruby, Ruby on Rails, Python, Go, Bash, SQL
Data & Messaging	PostgreSQL, Oracle Database, Redis, Kafka, ClickHouse, MySQL, MongoDB, Solr
Observability & Reliability	Prometheus, Grafana, Elasticsearch, Logstash, Kibana, Incident Response, SRE
AI Engineering	LLMs, MCP, Claude Code, AI-Assisted Developer Tooling, Engineering Automation

EXPERIENCE

- Senior Software Engineer II

Perforce Software (Puppet) - Pune, India

Aug 2023 - Present

 - Planned and delivered build, test, and release engineering improvements across Puppet Agent, Puppet Runtime, PXP Agent, Vanagon, CI/CD, packaging, and cross-platform infrastructure.
 - Maintained and released Puppet Agent across 10+ operating systems, resolving CVEs, OpenSSL/system-library issues, C/C++ dependencies, and platform-specific build and runtime failures.
 - Modernized Agent build and test infrastructure from legacy VMs to Docker, improving build performance by approximately 20%, removing VM provisioning dependencies, and accelerating support for new OS platforms.
 - Consolidated Puppet Runtime and PXP Agent Vanagon builds into a single project, simplifying maintenance and reducing agent build time by approximately 2–3 days.
 - Built and validated Puppet Agent compatibility with Puppet Enterprise through cross-platform and cross-version acceptance testing, improving release confidence.
 - Designed cloud data services using Python, AWS DataSync, EventBridge, Kubernetes, Docker, ArgoCD, ClickHouse, and Hasura for automated data processing, aggregation, storage, and visualization.
 - Improved engineering productivity through Jenkins optimization, Grafana/ArgoCD SSO, and AI-assisted tooling using Claude Code, MCP, custom skills, and automation.
- Senior Software Engineer

LTM (client: MSCI) - Mumbai, India

Apr 2021 - Aug 2023

 - Architected a reusable data-validation framework for a large-scale data platform using JRuby, Sinatra, OracleDB, and JavaScript, improving data quality and reporting accuracy.
 - Designed PL/SQL data-processing pipelines to import, validate, transform, and consolidate data from multiple source systems into the core platform.
 - Resolved critical data inconsistencies and client reporting issues by tracing failures across application, database, and data-processing layers and implementing durable fixes.
 - Contributed to the on-premise to Azure Kubernetes Service (AKS) migration, using Docker, Kubernetes, and deployment workflows to modernize infrastructure and improve scalability.

- Resolved complex performance and production issues across JRuby, OracleDB, Sinatra, Ext JS, and Kubernetes, improving system reliability and stability.

Senior Software Engineer

Jan 2020 - Apr 2021

Solbeg (Utilizecore) - Mumbai, India

- Modernized a multi-tenant SaaS platform using Ruby on Rails APIs, Vue.js, PostgreSQL, Redis, Passenger, and Linux, resolving architectural bottlenecks and improving scalability and performance.
- Led a 3-month production migration from Rails 5.0/Ruby 2.3 to Rails 6.0.3/Ruby 2.7.1, including CarrierWave to Active Storage migration while maintaining data integrity and service continuity.
- Redesigned critical system architecture and backend workflows, optimizing Rails, PostgreSQL, Redis, and background processing to resolve major performance and scalability issues.
- Engineered real-time progress tracking for long-running background jobs using Rails, Redis, Passenger, and asynchronous processing.
- Designed and managed multi-tenant production deployments on Linode, including tenant configuration, resource allocation, and multiple PostgreSQL databases.

Software Developer L2

Aug 2017 - Jan 2020

Mirraw - Mumbai, India

- Led a team of 4 engineers delivering major e-commerce features across Ruby on Rails, PostgreSQL, Solr, AWS S3, JavaScript, and jQuery.
- Architected a product ranking and A/B testing system, improving product visibility by 40–50% and contributing to increased revenue through better product discovery.
- Designed and delivered a warehouse SOR workflow, improving inventory management and reducing delivery turnaround time by approximately 20%.
- Integrated OnlineSales.ai Monetize for vendor-funded promotions, including order-flow tracking, inventory feeds, vendor-panel integration, REST APIs, and JWT authentication.
- Integrated Atlantic Shipper APIs to automate international shipment generation and tracking, increasing automated shipment processing by approximately 50%.
- Redesigned PostgreSQL database architecture and core workflows, improving scalability and maintainability, and built a multi-currency invoicing and large-file processing system using Rails, AWS S3, PDF/CSV processing, and tax calculations.
- Led warehouse inbound automation using Django REST Framework, Celery, PyQt, Raspberry Pi, and Heroku.

EARLIER EXPERIENCE

Software Engineer — Flixmates - Mumbai, India

May 2017 – Aug 2017

Built and deployed a web application from scratch as part of a 3-member engineering team using Laravel, PostgreSQL, JavaScript, and AWS EC2.

Desktop Engineer — Apexcel Informatics Pvt. Ltd - Mumbai, India

May 2014 – Jun 2014

Supported an HCL-led enterprise IT deployment for LIC, configuring Windows systems, domain integration, networking, and user-profile migration.

OPEN SOURCE

Contributor to Puppet Agent, Facter, Modules, and multiple Ruby gems, with numerous merged pull requests. many merged pull requests - github.com/imaqsood

EDUCATION

Bachelor of Engineering, Computer Engineering - University of Mumbai

2017

Diploma in Computer Engineering - MSBTE

2014
